DETAILED ACTION

EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with David Volejnicek on 12/11/06.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Abstract of the Disclosure

A user interface (132)--be it graphical (GUI) or telephony (TUI) to an application (120) is defined by stored interface and feature description documents (122,124) written in XML and JavaScript, so that the user interface and changes thereto can be effected without access to source code. Interface description documents define the appearance and the behavior of the user interface toward the user, while feature description documents define the interaction of the user interface with the interfaced-to application, both in conformity with a user-interface object model (310). Stored connector object plug-ins (126) define connector objects for rendering elements of feature description documents, and stored layout object plug-ins (128) define layout objects for rendering elements of interface description documents of one or more interfaces.

Claim 54 (Currently Amended) An arrangement comprising:

description documents, stored in a computer readable-medium, that define a user interface, comprised of interface elements, in the terms of an object model, some of the

description documents defining a first type of the user interface and others of the description documents defining a second type of the user interface;

renderers, implemented in a computer, each for rendering a different one of the interface elements, some of the renderers for rendering the first type of the user interface and others of the renderers for rendering the second type of the user interface; and

an interface implementation engine (interactor), implemented in a computer, for parsing the description documents of a selected either type of the user interface to identify the elements of the selected type of user interface, for reflecting the identified elements into the object model to generate an instance of the object model that represents the selected type of the user interface, for loading the renderers corresponding to the reflected elements into the interactor to create a renderer of the selected type of the user interface, and for executing the renderer to create the selected type of the user interface.

Allowable Subject Matter

Claims 29-61 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
